January 14, 2012

Dear Educator,

It's that time of year again: The Northern Chapter of the New Mexico Network for Women in Science and Engineering - also known as Los Alamos Women in Science (LAWIS) – invites you and your students to participate in our *33rd Annual Expanding Your Horizons Conference (EYH11)*. This year's EYH is scheduled in Los Alamos as follows:

Thursday, March 21, 2012
Crossroads Bible Church, 97 East Road, Los Alamos

We host young women in grades 8-10 and their teachers from the northern New Mexico region and encourage the students to pursue careers in the Science, Technology, Engineering, Math (STEM), and related fields to become the next generation of scientists, engineers, and mathematicians.

EYH goals are:

- To provide young women with opportunities to meet and interact with positive women role models who are active in math- and science-related careers;
- To involve young women with limited opportunities for success in positive experiences in math and science;
- To increase the interest of young women in math and science by providing exciting and fun hands-on learning experiences;
- To encourage young women to study as much math and science as possible by showing them the benefits of education and its relevance to their lives; and,
- To foster awareness of career opportunities in math- and science-related careers.

This conference is jointly sponsored by the Los Alamos branch of the New Mexico Network for Women in Science and Engineering and the Los Alamos National Laboratory. Both organizations are eager to expand your students' horizons and welcome you to join us and other guest students and schools from northern New Mexico for an enriching day.

This year the conference is charging a \$5.00 registration fee, payable in advance or onsite. Waivers are available, contact us for more information.

Please feel free to pass this information along to science and math teachers and/or counselors who could sponsor the girls and attend the concurrent Teacher Workshop. The attached flyer provides program and registration details.

Sincerely,

Jan Frigo, EYH12 Chair
